

Orthopedic Physical Therapy & The Body Shoppe Fitness

Scheduling multiple diagnoses/treatments

Unless otherwise approved by owners via billing personnel:

Patients will be booked for only one diagnosis per day. If a patient needs to be seen for two or more diagnoses concurrently, they need to schedule on different days.

Except for evaluations, patients will be booked for 30-minute treatment periods.

These rules apply to all types of treatment. (i.e.: If a patient requires orthotics, they must be booked on a different day than a regularly schedule treatment)

If there are extenuating circumstances that make it difficult for a patient to schedule per the above, please notify the Billing Supervisor, who will, in turn, discuss the situation with the owners for a policy exception.
